- (三) 請翻譯內容並提出你對此內容的看法。

Digital applications for music education have been growing at an astonishing rate, and these resources are changing the ways

(第1頁,共2頁)

people teach, learn, and make music. The Digital Resource Exchange About Music (DREAM) is an online tool for exchanging information about digital learning tools for music education. DREAM was designed by our team to encourage music teachers to learn about digital resources related to learning to play a musical instrument, both in classroom and independent music studio settings. In addition to enabling music teachers to learn about resources, DREAM allows music teachers to evaluate the resources based on their own experiences using the resources, to read about other teachers' views of the resources, and to add resources to the learning objects repository. During the demonstration of DREAM, we will showcase some of the resources and discuss the evolution of the design of DREAM. We will encourage participants to explore DREAM on the devices we provide and/or on their own laptops, tablets, or smart phones.
