### Introduction

## Citation-引文(註)

According to traditional Chinese medicine, the pericardial meridian is associated with the pain or fullness in the chest, palpitations, depression, restlessness, manic or depressive disorders, nausea or vomiting, hiccups, gastric pain, and distension in the upper abdomen (Bai and Baron, 2001). Since the parasympathetic modulation of both heart and gut is largely mediated by the vagus nerve, and since vagal stimulation of the gut can result in increased peristalsis while the vagal stimulation of the heart can result in decreased heart rate (Guyton and Hall, 1996), it is speculated that to some extent the pericardium meridian might be associated with the autonomic nervous modulation of the subject.

Acupuncture or acupressure at the Neiguan (P6) point, the most frequently used acupoint

in the pericardium meridian, has been shown to 1987, 1988, 1989a and b; Ho *et al.*, 1989; De *A et al.*, 1994; Fan *et al.*, 1997; Harmon *et al.*, 20 related to autonomic nervous activity (Morro speculated that the autonomic nervous activity P6 point was performed.

Heart rate variability analysis is a useful r autonomic nervous modulation of heart rate. S vagal modulation, and the restoration of vagal m

You are currently running version 19.2.0.13018. Would you like to learn more about EndNote X9.3.3?

**Important:** When you open an existing library in X9.3 and later, it will create a converted version for use with this new database engine. The original library will not be changed, so you can continue using it X9.2 or earlier. Alternatively, use Sync to move your data across systems and versions.

## EndNote X9.3.3 Update

This update contains the following:

- Resolved a problem where renamed file attachments would not update during sync
- Issue importing PDFs using Kopernio on Firefox has been resolved
- Resolved issue with syncing Group Sets, Groups, and File Attachments in read-only shared libraries
- Corrected issue where display preferences were not saving.

### **Output Formats with Corresponding Import Options**

To import references, you must first save references from an information provider as a plain text (.txt) file in a tagged format. If references are sent to you in the body of an email, save the email to a plain text file for importing.

- 1. In EndNote, select the File > Import > File option to select the tagged text file that you saved from the information provider.
- Select the appropriate import filter from the Import Filter menu. The Other Filters option opens a dialog that displays all filters in the EndNote product. All filters direct tagged bits of bibliographic information to corresponding EndNote fields.
- 3. Start the import process by clicking the Import button.

The list below provides a direct export of references to EndNote. It is only a small list of information providers. Note the following before you begin.

- There are hundreds of import filters available in the EndNote Filters folder.
- Select Edit > Import Filters> Open Filter Manager to look into the EndNote Import Filters table for information on how to
  open, view, and edit filters. Many of the filters include a Comments and Limitations section with tips on how to download
  references for importing into EndNote.
- Go to our Web site at <u>http://www.endnote.com/support/enfilters.asp</u> for updated information and import filters, including detailed information on how to save and download data directly to EndNote.

See Importing Reference Data into EndNote for more detailed information about importing.

See General Importing Instructions for more step-by-step instructions.

Information Provider	Recommended Download Format	Import Filter
AARP AgeLine	http://research.aarp.org/ageline/home.html There is no method for downloading data from this database. Instead, save the results screen as a plain text file with your web browser's Save command. The resulting text file contains tags which are preceded by 18 spaces.	Ageline (AARP) filter
ACM Digital Library (Association for	Users with subscription access to this web site can save multiple records to a BINDER. Once saved, you can export the records in an EndNote format. Non-subscribers can download one record at a time:	EndNote Import

## 資料匯入 – 純文字檔

資料庫有支援匯出至EndNote,但下載的 是.txt檔,我該如何?

當我們需要手動匯入資料時,根據不同的資料 庫,匯入時要選擇的Import Option會有不同!

※可在EndNote程式中按下鍵盤上的 [F1] > [Direct Export Formats and Import Formats] > [Output Formats with Corresponding Import Options]中 查看對應的Import Option

# 示範資料庫:中國期刊全文資料庫

Supplementary table 1 | Equations describing the 'Likely water' cluster hull and cluster overlaps in the multidimensional feature-space.

### SUPPLEMENTARY INFORMATION

doi:10.1038/nature20584

Supplementary table 1 | Equations describing the 'Likely water' cluster hull and cluster overlaps in the multidimensional feature-space.

These equations describe the 'Likely water' cluster in the multidimensional feature-space. By definition, part of this cluster contain pixels that are not water, and request additional processing steps to be properly assigned. The method section provides details about the usages of this equations within the expert system classifier.

Name	Description	Equations describing the "Likely water" cluster hull and cluster overlaps in the multidimensional feature-space
water1	Water cluster where NDVI <0	b('value')<0.62&&(((b('hue')<((-9.867784585617413*b('nd'))+238.26034242940045))&&(b('hue')>((- 12960.00000000335*b('nd'))- 12714.048607819708))&&(b('hue')>((23.627546071775214*b('nd'))+255.53176874753507)))  ((b('hue')<((- 54.685799109352004*b('nd'))+215.15052322834936))&&(b('hue')<((23.627546071775214*b('nd'))+255.5317687475 3507))&&(b('hue')>((-7.321079389910027*b('nd'))+224.6166270396205)))  ((b('hue')<((- 172.0408163265306*b('nd'))+191.69646750224035))&&(b('hue')<((-

## 資料匯入 – 自行鍵入

### 須注意三個地方:

 文獻類型[Reference Type]要選擇正確。
 一個作者一行,兩個作者兩行,以此類推。
 當以英文輸入時,作者姓氏在前要加逗點, 如: Wang, Da Min 姓氏在後不用加逗點。

> 偷吃步? 可用Online Search或是Google Scholar匯入

> > 項睿資訊有限公司

Little is known about PM1 effects on respiratory health, relative to larger size fractions (PM2.5). To address this literature gap, we assessed associations between PM1 exposure and asthmatic symptoms in Chinese children and adolescents, compared with PM2.5(Strotz, 1956; Teesalu, Airaksinen, Tuulonen, Nieminen, & Alanko, 1997).

METHODS: A total of 59,754 children, aged 2-17years, were recruited from 94 kindergartens, elementary and middle schools in the Seven Northeast Cities (SNEC) study, during 2012-2013.

Little is known about PM1 effects on respiratory health, relative to larger size fractions (PM2.5). To address this literature gap, we assessed associations between PM1 exposure and asthmatic symptoms in Chinese children and adolescents, compared with PM2.5(Strotz, 1956; Teesalu, Airaksinen, Tuulonen, Nieminen, & Alanko, 1997).

METHODS: A total of 59,754 children, aged 2-17years, were recruited from 94 kindergartens, elementary and middle schools in the Seven Northeast Cities (SNEC) study, during 2012-2013.

Background Data for trends in prevalence of asthma, allergic <u>rhinoconjunctivitis</u>, and eczema over time are scarce. We repeated the International Study of Asthma and Allergies in Childhood (ISAAC) at least 5 years after Phase One, to examine changes in the prevalence of symptoms of these disorders.(Asher et al., 1995; Asher et al., 2006).

μ

Findings Phase Three was completed a mean of 7 years after Phase One. Most <u>centres</u> showed a change in prevalence of 1 or more SE for at least one disorder, with increases being twice as common as decreases, and increases being more common in the 6-7 year age-group than in the 13-14 year agegroup, and at most levels of mean <u>prevalence</u>(Bousquet et al., 2008; Constantine, Bressler, Petroni, Metcalfe, & Carter, 2018; Guenter et al., 2018).<sup>4</sup>
